1909

Eighth Edition—315,000 Copies

Important Notice

OWING to misunderstandings which have several times occurred on the part of persons interested in the purchase of plumbing fixtures, we desire to state that the list prices printed in our catalogues, booklets and advertisements do not include freight charges.

It should therefore be kept in mind, especially by purchasers in the far West, that our list prices are compiled with Pittsburgh as their basis.

"Standard"

Green and Gold Guarantee Label

Exact Fac-similes of the "Standard" GREEN and GOLD Guarantee Label

Each and every piece of genuine "Standard" Guaranteed Porcelain Enameled Ware bears one of the above GREEN and GOLD Guarantee Labels, and has our trade-mark "Standard" cast on the exterior.

When you order or specify "Standard" plumbing fixtures, look for this label, which is the mark of guaranteed quality, providing assurance of unsurpassed durability and beauty of design.

If our GREEN and GOLD Guarantee Label is not displayed on the fixture it is *not* "Standard" Ware, and you should not accept it. The "Standard" Guarantee means all that it implies, and you take no risk in buying or specifying any "Standard" fixture bearing this label.

Always order or specify by Catalogue "P" plate number and brand name of fixture (where given).

FAC-SIMILE OF GUARANTEE RECORD.

GUARANTEE NUMBER

REGISTER NUMBER

As we GUARANTEE every piece of "Standard" Porcelain Enameled Ware, we ask that you kindly fill out this form and return it to us at your earliest convenience. We desire this record of where our goods are installed so that we can investigate accurately any complaints or claims made by Architects, Contractors or Plumbers. Upon receipt of this blank properly filled out and signed by your Architect, Plumber and yourself, we will issue our official written guarantee covering a period of two years from date goods were installed.

Unless we have information on record showing that you have installed genuine Green and Gold Label "Standard" Ware, it is difficult for us to fulfill our guarantee. For your protection we will keep this record two years.

Every piece of "Standard" Ware bears our "Standard" Green and Gold guarantee label and has our trade-mark "Standard" cast on the exterior. No others are genuine or protected by our guarantee. Refuse substitutes, as they are all inferior, and will cost you more in the end. If our goods are not entirely satisfactory, we would ask, as a special favor, that you write us direct on the subject.

"Standard" Porcelain Enameled Ware has been specified and will be used in { building } the following

Announcement

¶ Since this edition of MODERN BATHROOMS was published, the guarantee, furnished to purchasers of Genuine "Standard" Green and Gold Label Porcelain Enameled Ware, has been extended to cover a period of five years instead of two years as specified in the fac-simile of "Standard" guarantee shown herein.

¶ For your protection the Guarantee record will also be kept for a period of five years instead of two years.

Assistant to First Vice President

NOT VALID UNTIL OFFICIALLY DATED, SIGNED AND SEALED

THE "Standard" GUARANTEE FURNISHES THE SAME PROTECTION TO YOUR
PLUMBING FIXTURES THAT AN INSURANCE POLICY DOES TO YOUR HOME.

Get What You Ask For

THERE are many reasons why you ask for advertised articles, but absolutely none why you should let anyone palm off something which he claims to be "just as good" or "better" or "the same thing" when you ask for "Standard" Ware.

"Standard" Ware must of necessity be of the highest quality, otherwise it could not be successfully sold and the advertising continued.

The building public recognizes the superior quality of "Standard" Ware. The substitutor realizes that fact and tries to sell inferior goods on the "Standard" reputation.

PROTECT YOURSELF

BY POSITIVELY REFUSING SUBSTITUTES

F O R E W O R D

THE first edition of "Modern Bath Rooms" was issued seven years ago, and while considered very complete at the time, there is a vast improvement in this, the eighth edition, which contains almost twice as many pages, and gives much practical advice for the home builder or those desiring to remodel their present sanitary equipment. Attention is particularly directed to that portion of the book illustrating bathroom, kitchen and laundry interiors, which are reproduced direct from photographs of our goods.

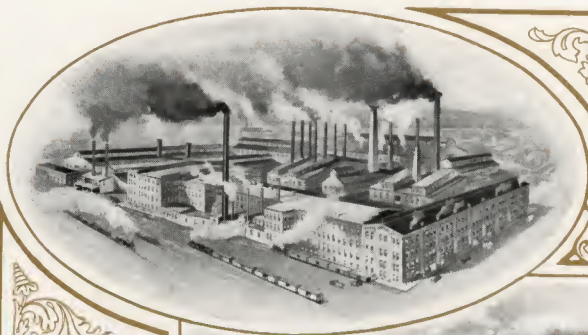

"Standard" Plumbing Fixtures need no introduction to the American public, nor, for that matter, to the entire world. Their great and constantly increasing use in every country on the globe proclaims them to be of the highest quality that skillful workmanship and best material can produce.

THE manufacture of "**Standard**" Porcelain Enameled Plumbing Fixtures involves the old and the new, in that the art of enameling dates back in a primitive way for many centuries, whereas its application to plumbing fixtures had its origin in the last half century, during which time its development has been so rapid as to be almost astonishing.

When the attempt was first made to apply an enamel coating to a metal body, it was found to be extremely difficult and so costly as to be almost prohibitory for general use. However, these difficulties were thought by the pioneers of our company to be possible of solution, and the "**Standard**" product of to-day is ample proof that they were. What has been accomplished has been the result of long and diligent labor, research and study, and the expenditure of large sums of money.

From a small organization, our company has grown to be the largest in the world in the line in which it is engaged and our product has been for many years known in every civilized part of the world. Our claims for the merits of our goods are no idle boast, and furthermore are strongly backed by our guarantee which is printed elsewhere in this book.

In buying "**Standard**" Goods, you obtain the result of our many years of experience, you have the advantage of our guarantee, and the benefit of a large sales organization whose object is to aid the home builder in obtaining the plumbing equipment best suited to his requirements at the most moderate cost.

HEALTH, CLEANLINESS, HAPPINESS

THESE conditions may as readily be attained by bathing in a porcelain enameled bath as by indulging in surf bathing, which has become so popular with the American public.

You will so much enjoy using, in your own home, a pure white inviting bath with an overhead shower, that the pleasure you derive from ocean bathing will be relegated to a secondary position in your list of enjoyments.

Unlike the ocean bath, the pleasure of bathing in your home is not confined to part of the year but is ready at all times to help promote the health, cleanliness and happiness of the user.

DANGERS OF DEFECTIVE OR INFERIOR PLUMBING

DEFFECTIVE plumbing permits the entrance into the house of sewer gas, bearing germs of contagious diseases to which the human system readily succumbs.

It should be remembered that sewer gas is not necessarily generated in the sewer, but that it is quite as frequently created in the plumbing system within the house itself. This is invariably the case if there are any obstructions or uneven surfaces in the pipes where filth may collect.

Not only must the gas from the sewer be prevented from entering the house, but that from the waste pipes within must be thoroughly excluded from the apartments and its egress provided for.

If your plumber has not done a perfect piece of work, or if the plumbing has become deranged, your dwelling is contaminated with sewer gases and you are at the mercy of the germs which this foul air carries.

The most dangerous sewer gases are often inodorous, and are therefore not discovered until ill health renders necessary an examination of the existing sanitary conditions, but often too late to repair the damage done.

Designs of MODERN BATH ROOMS

IN THE FOLLOWING ILLUSTRATIONS FROM ACTUAL PHOTOGRAPHS ATTEMPTS HAVE BEEN MADE TO SHOW BATHROOM INTERIORS OF THE MOST MODERN TYPE. LIST PRICES AND DETAILED DESCRIPTION OF EACH FIXTURE ARE ALSO GIVEN, TOGETHER WITH FLOOR SPACE REQUIRED FOR COMPLETE INSTALLATION

*"Certainly this is a duty, not a sin,
"Cleanliness is indeed next to Godliness."*

John Wesley

HARMONIOUS DECORATIVE EFFECTS

WHILE the first requisites of the bathroom are healthfulness and comfort, there is excellent opportunity for beauty and harmony in decorative effects. The best effects are obtained by the use of a simple, subdued treatment applied to the exterior of the bath and other fixtures to which a decoration is applicable.

The same treatment should be carried throughout the room, and if the treatment be wisely chosen and well applied, the result will be so highly pleasing as to add greatly to the value and charm of the room.

The process of finishing the exterior of "**Standard**" Porcelain Enameled Ware is of such a nature that it can only be applied at our factories, inasmuch as the castings must be dressed perfectly smooth, a character of work which requires special facilities and skill.

Our prices are moderate, being lower in comparison than you would be required to pay a painter to put on the same number of coats of ordinary paint, without the baking and hand rubbing to which all fixtures which we decorate are subjected. In addition, baths, etc., decorated by our process will wear better and be more satisfactory in every respect.

We have about forty regular border designs, but we are prepared to furnish special designs to match tiling or interior decorations.

THE IMPORTANCE OF HIGH GRADE SANITARY PLUMBING

GOOD plumbing is one of the most important features about a house, and should receive careful attention at the hands of the owner at the time the architect is making the plans and specifications.

It does not pay to install cheap plumbing, because there is no one feature in the construction of a house that will be as unsatisfactory—both as to the fixtures and the workmanship. On the other hand, there is nothing which will appeal so strongly to the fastidious and careful housewife, and be so great a source of enjoyment, as modern high-grade plumbing.

Many families pay out yearly for doctor bills, for sickness caused by deadly sewer gases due to poor plumbing, more than the difference between the cost of the cheapest and the best work.

You cannot have too many safeguards for the health of your family and yourself. It is well to keep in mind, when arranging the sanitary equipment of your home, the fact that your family may be required to occupy the house for a long period (without new plumbing being installed), therefore, the slight extra cost of the best plumbing will, in reality, be *health assurance*, as well as a saving in repair bills.

LAVATORIES FOR DRESSING CHAMBERS

Sleeping Apartment with "Standard" Lavatory

EVERY dressing chamber should be equipped with a "Standard" Lavatory.

Have you ever stopped to consider how delightfully convenient it would be to have hot and cold running water in your dressing chamber, sleeping apartment or first-floor toilet room? Its presence would afford you the highest degree of comfort.

If your room contained a lavatory you would not be required, when arising in the morning, to partially dress in order to reach the bathroom to perform the toilet, and possibly disturb the other members of the household. The afternoon and evening toilet could also be made amid the same pleasant surroundings. The many advantages of the strictly modern idea of having "Standard" lavatories in the rooms mentioned are readily appreciated.

One other suggestion is that you should not overlook the arrangement of suitable sanitary equipment for the rooms occupied by your maid, butler and other servants. Proper provision in this respect will encourage scrupulous attention to their personal cleanliness and appearance.

SANITARY BATHROOM WALLS AND FLOORS

WALLS and floors can be treated in many ways, all inexpensively, but the ideal modern bathroom should be tiled, not necessarily all over, but floors in unglazed ceramic tile. If, however, it is desired to economize, have a hardwood floor of oak, maple, birch or Georgia pine, filled, stained, oiled or waxed to suit the individual taste. A small artistic rug, oriental preferred, costing from \$5.00 to \$25.00, will give the room a finishing touch. Do not think of using a wood floor in a bathroom without attempting to make it as near waterproof as possible, or you may ruin your ceiling or wall decoration on the floor below, as has so often occurred where only ordinary soft pine floors have been put in bathrooms without filling, oiling or waxing to prevent water soaking through.

Glazed white or unglazed tinted tiles make the best wall covering for the bathroom, especially for wainscoting, 4, 4½ or 5 feet high. Above the wainscot finish in oil colors to suit the individual taste. Never use ordinary wall paper on bathrooms, as the steam and moisture soak the paper and cause it to fall off or discolor. It is best not to paint directly on the plastered walls, as cracks may develop and spoil all your decoration. Glazed tile paper can be used, but it costs almost as much as the decorated walls and it is not nearly so artistic or durable.

It is preferable not to make the bathroom all white, as it gives a cold, cheerless appearance, and does not add any to its sanitary effectiveness. Decorate the walls and ceilings with some light tint, such as pale green, buff, terra cotta, etc. The ceiling should be two or three shades lighter than the side walls, but in the same general tone or color scheme.

T H E S H O W E R B A T H

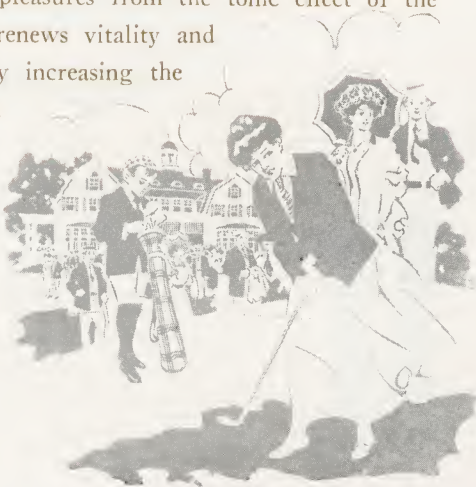

A BATHROOM is not complete if it is without some style of shower. To those who desire the more elaborate permanent fixtures we call attention to our line. We make a specialty of building showers to order—any shape or size—and to fit any space, for any purpose. Prices for permanent showers range from \$25 to \$500. Ask your plumber to show you our General Catalogue "P," illustrating many styles of showers which we carry in stock. Special shapes and sizes built to order on short notice.

The luxury and pleasure of a shower bath is a revelation to those not already acquainted with its charming delights.

Life itself takes on added pleasures from the tonic effect of the daily shower. It invigorates, renews vitality and strengthens the heart action by increasing the surface circulation, all of which stimulate the appetite and improve the general health.

Beauty depends more upon health than anything else, and one of the best methods of gaining and retaining perfect health is to bathe, and bathe often.

For No 1 Zinc White Finish on Exterior of Receptor, add 6.50

Shower can be connected to use over bath, instead of with Receptor, if desired

"Standard" PORTABLE SHOWER

THE "Standard" Portable Shower Bath is in daily use by thousands who have learned the value of physical culture followed by a shower. All agree on the permanency of its strengthening and invigorating effects.

The "Standard" Portable Shower is an ideal fixture for those who live in rented houses or apartments. It is, as its name implies—portable—easily put in place or removed. It is inexpensive when compared with the permanent showers, and though portable, its operation is just as efficient. If you move, it is not a part of the permanent plumbing to be left for the next tenant.

BATHING OR SHAMPOOING

WOMEN frequently object to the use of a shower bath on account of the wetting of the hair. In order to overcome this, we furnish, free of charge, with each **"Standard"** Portable Shower, a rubber cloth cap of the highest grade and quality through the use of which this wetting is obviated. To most women the shampooing of their hair is a tedious and vexatious task, but not so if they use a shower bath, as a much more satisfactory shampoo may be had in five minutes with a shower

than in half an hour without.

The **"Standard"** Portable Shower is worth all it costs for this purpose alone, and it is a real necessity for every home not otherwise equipped with a permanent shower.

It can be attached to any bath fitted with Double Bath or Top Nozzle Supply Faucet.

A shower bath is unquestionably healthful and enjoyable after exercising

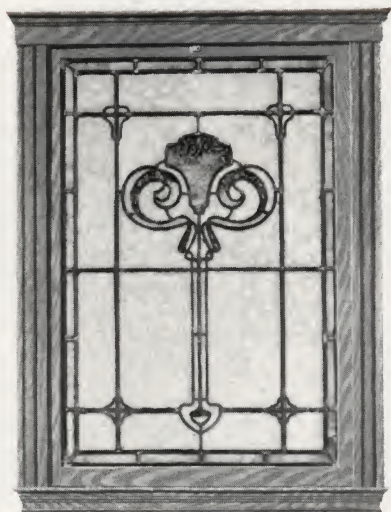

ARTISTIC BATHROOM WINDOWS

A BATHROOM is not entirely complete if proper treatment of its lighting, both natural and artificial, is neglected. Art glass windows are so reasonable in cost that the most modest cottage can afford this finishing touch to the most important room in the home—the bathroom. Glass like that shown on this page or in our various interiors on preceding pages, costs from 75 cents to \$3.50 per square foot, depending on the design and the locality.

By all means, if building or remodeling, consult a reliable art glass manufacturer or dealer, and

Art Glass Window designed especially for Bathrooms

Art Glass Window designed especially for Bathrooms

add this touch of beauty to your home. It is not necessary to confine the purchasing of art glass windows to one locality; by sending your window sash to any manufacturer in the country, and stating your preference for color scheme and design, with the price per square foot you desire to pay, the manufacturer will return to you your sash fitted with the glass, all ready to put in your window frame.

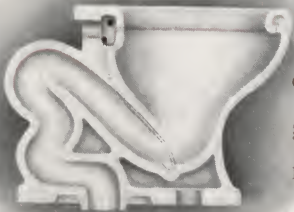

We recommend that your home or nearest dealer or manufacturer be patronized if possible, to save transportation charges and time.

"Standard"

C L O S E T C O M B I N A T I O N S

IN this class of sanitary equipment, perfect sanitation is most essential. The surface of the material used should be hard, smooth and permanently non-absorbent, and it is in these features that **"Standard"** Vitrite Porcelain Closets are unequalled.

The low tank combinations illustrated herein are conceded to have advantages over high tanks, due to their compact construction and different principles of operation. They can be installed under windows or stairways and similar places where there is not sufficient height for the high tank combinations, and they lend themselves more readily to the artistic and economic arrangement of the bath or toilet room. They also have the additional advantage of being more nearly noiseless. By reducing the height from which the water falls in flushing the bowl, the consequent noise is also proportionately diminished.

Each combination is fitted and thoroughly tested before shipment, and we guarantee each closet to be exactly as represented and to give the best of service.

ADVICE TO PROSPECTIVE BUILDERS

CHOOSE only well designed and approved styles, and select furnishings or fixtures in harmony with your building.

Accept good work and reliable service only.

Imitations are shams at best; have none of them. If necessary to reduce cost, build smaller and use fewer fixtures, rather than cheaper ones.

Read your specifications carefully and study your plans frequently—become familiar with every detail, even if it becomes necessary to seek professional advice.

Inferior goods and cheap workmanship give poor service and are more expensive in the end.

Good taste should not be sacrificed to economy.

Substitutes are as a rule inferior to the original article and are not offered for your benefit. Specify only articles of proved merit and insist that the specifications be rigidly followed.

T H E M O D E R N K I T C H E N

AN error commonly made by home owners is in underestimating the necessity of proper sanitary equipment for the kitchen. Only a few years ago it was considered good form to encase the sink in wood, thereby concealing the trap, making it inaccessible and offering an opportune place for the collection of germs and vermin. Many persons have actually been horrified to examine conditions of this kind and learn the true state of affairs.

Do not permit this condition to exist in your household. If there is need for improvement do not delay, and if you are building a new home provide as liberally as possible for the kitchen. Do not lose sight of the fact that your food is prepared in the kitchen and the utensils in which it is prepared depend on the sanitary arrangements for cleanliness, therefore safeguard against contamination of either food or utensils.

Acids, lye, coffee grounds, tea leaves and other such substances should not be emptied into the sink. Acids will harm the material of which the sink is made; coffee grounds and tea leaves will adhere to waste pipes, and lye, which many use to cleanse the waste, will, when combined with water and grease, form soap and clog the pipes. Hot water and ammonia, used frequently, will keep drain pipes in good condition.

T H E A R C H I T E C T

FOR economic and practical results, an architect should be consulted on all building operations, no matter how small. His services are not expensive, on the contrary his counsel will in most cases result in an absolute saving.

The modern architect devotes years to the scientific study of all matters pertaining to his profession, and is therefore qualified to develop beauty and strength from seemingly unimportant details, which the ordinary builder would overlook, as well as to make the best use of space, and in the end blend the entire operation into a harmonious home or other building, as the case may be.

The architect's services are also valuable in the selection of the proper materials, and in acting as arbiter of disputes which might arise between the owner and the contractor. The contractors, anticipating future business from the architect, will be more willing to abide by an adverse decision from the architect than from the owner. Every chance is in favor of the architect saving you money if you do not hamper him.

THE MODERN SANITARY LAUNDRY

A WELL equipped laundry is just as essential to the happiness of the modern housewife as the bathroom.

When the laundry is fitted with a set of **"Standard"** Porcelain Enameled Laundry Trays, it may be truly called a *modern laundry*, as there is no water to carry, no leakage and damp floors, and no tubs to upset. **"Standard"** Laundry Trays are made in many designs of one, two or three compartments (each compartment in one piece, free of joints), complete with wringer holders and every thoughtful convenience.

A Modern Laundry

"Standard" Porcelain Enameled Ware is the only perfect material for laundry trays. Slate, soapstone, earthenware and other such porous substances, absorb the wash water and suds, and long after being emptied remain damp and discolored, emitting objectionable odors. **"Standard"** Laundry Trays are absolutely free from these unsanitary features.

The arrangement of the laundry should provide for good light and perfect ventilation, and the hot water heating apparatus should be such as to provide an abundant supply at all times.

"Standard" LAUNDRY, DESIGN H

The **"Standard"** Ware shown in this laundry consists of **"Standard"** PORCELAIN ENAMELED Roll Rim Laundry Trays, Plate P 1276, with Nickel-plated Union Strips and Hardwood Wringer Holders, Nickel-plated Soap Dishes, Waste Plugs, Couplings and Rubber Stoppers, Nickel-plated Special Round Top Laundry Tray Bibbs, with Supply Pipes to Floor, Continuous Waste and Vented "S" Trap.

DIMENSIONS

Front to back (inside)	21 $\frac{3}{4}$ inches
Front to back (outside)	27 inches
Length inside	23 inches
Length over all (set of three Trays)	83 inches
Depth inside	14 $\frac{1}{4}$ inches
Height from floor to top of rim	31 $\frac{1}{2}$ inches

	One Section	Two Section	Three Section
Plate P 1276 as described	\$33.00	\$60.00	\$87.25
Plate P 1276 A, less Supply Pipes, Waste and Trap	24.50	45.00	67.50
If without Bibbs deduct per pair			4.50
For Brass Overflow add each Tray			2.00

"Standard" LAUNDRY, DESIGN 1

The "Standard" Ware shown in this laundry consists of "Standard" PORCELAIN ENAMELED Flat Rim Laundry Trays, Plate P 1296, with Nickel-plated Soap Dishes, Waste Plugs, Couplings and Rubber Stoppers, Nickel-plated Fuller Adjustable Flange Bibbs, Continuous Waste and Vented "S" Trap.

Plate P 1296 A, less Waste, Trap and Faucets	11.00	22.00	33.00

For Brass Overflow, add each Tray, \$2.00

THE step from the old-time bathroom, with its marble washstand and copper bath tub to a more modern equipment, seemed such a long one that a room was considered complete when the bath, lavatory, shower, and closet were installed. However, another step forward has been taken, and now the bath or toilet room is not complete unless it includes towel bars and baskets, soap dishes, mirror and other accessories which add the last touch of comfort and convenience.

The bathroom shown above is ideal in this respect. No accessories that would add comfort or convenience were omitted. On the following pages, we show a small portion of our complete line of "Standard" accessories. Space does not permit the showing of our complete line consisting of several hundred different pieces.

The "Standard" Showrooms (see page 7) carry a complete line of accessories, and in addition, we are in a position to furnish illustrated pamphlets to those who cannot call at our showrooms.

In "Standard" Toilet and Bathroom accessories, quality manifests itself as strongly as in all other "Standard" goods.

THE CARE OF PLUMBING FIXTURES

THERE IS NO OTHER PART OF A HOUSE THAT WILL GIVE THE SAME AMOUNT OF SATISFACTION AND PLEASURE FOR THE CARE DEVOTED TO IT AS THE BATHROOM.

DO not use gritty soaps or soap powders, or preparations containing acids, to clean enameled ware.

We recommend **"PORCELA,"** manufactured especially for cleaning and polishing porcelain enameled ware. It is the best preparation made for the purpose and is guaranteed to be absolutely harmless. Ask your plumber or other dealer for it, or send us 20 cents in stamps for regular package by mail, or write for free sample.

Give the same careful attention to the bathroom that you would bestow on the best room in the house. Treat **"Standard"** Porcelain Enameled Ware as you would fine china or glassware.

CAUTION

DO NOT USE SCOURING PREPARATIONS OF ANY KIND TO CLEAN THIS FIXTURE. THE GLAZE ON THIS WARE IS AS FINE AS THAT ON HIGH GRADE CHINA AND TO SUBJECT IT TO THE HARMFUL USE OF SCOURING PREPARATIONS (WHICH INVARIABLY CONTAIN ACID OR GRIT) WILL IN TIME RESULT IN DESTROYING IT.

"PORCELA" IS THE ONLY PREPARATION MADE EXCLUSIVELY FOR CLEANING AND POLISHING ENAMELED WARE THAT WE CAN RECOMMEND. BY ITS USE THE BRILLIANCE AND LUSTRE OF THE GLAZED SURFACE WILL BE RETAINED INDEFINITELY.

HOW TO ORDER
"Standard"
PLUMBING FIXTURES

WHEN specifying or ordering "Standard" goods, to avoid confusion and error, and to protect yourself against the substitution of an inferior grade of other make, be sure to mention either the design you wish or the plate number given herein, also insist that each fixture bear the "Standard" Green and Gold Guarantee Label.

This Guarantee Label appears on only the genuine "Standard" Porcelain Enameled Ware, and is an assurance to you of the high quality and sanitary efficiency characteristic of genuine "Standard" ware.

If you have decided to use "Standard" fixtures, instruct your architect or plumber to specify and order "Standard" Green and Gold Label guaranteed fixtures, made by the **Standard Sanitary Mfg. Co.**, Pittsburgh, U. S. A. See that the goods you select are installed according to specifications.

The plumber who is successful in securing your contract will, without any difficulty whatever, be able to secure genuine "Standard" goods, as they are sold all over the world, and are carried in stock by dealers and plumbers generally.

Standard Sanitary Mfg. Co.
